

Hi friend,

Are you curious about all the hype surrounding artificial intelligence (AI) and large language models (LLMs) like ChatGPT? Wondering if this new technology can help you in your learning journey? Look no further. We've got you covered in our brand-new AI for education course.

In this FREE, first-of-its kind course, you will learn

- what AI is good at (and not-so-good at) yet;
- how you can use it to boost your learning; and
- questions we should all be asking about AI.

### Start AI course

Did you hear? We're using GPT-4 from OpenAI to explore the ways in which AI can enhance learning. We'd love for you to join us in experimenting with Khan Academy's new AI guide called Khanmigo and give us feedback on how we might improve it. In this early development phase, you must be 18 or older and live in the United States to participate. We can only do this testing with your support. We are asking for a monthly donation of \$20 or more to help us develop AI learning features and other educational resources. This is an evolving project and the donation amount may change after June 15. Help shape the future of education!

### Test Khanmigo

We hope you'll join us in this exciting new era of learning.

The Khan Academy team
